

## Gondia Education's Society

### N.M.D. College, Gondia

Session: 2023-2024

The Agro Exhibition is one of the distinctive features of College. Since an educational college is responsible for contributing in national development, keeping in view this the College organizes Agro-exhibition to provide an opportunity to local farmers to show their skills and products to the locals directly, to involve the participation of local public and students in the exhibition, to make people aware of the distinctiveness of their locality as far as the agricultural achievements are concerned and to provide a platform to honor the local farmers as far as the organic agro-products and crops are concerned.

#### Institutional Distinctiveness - Photographs
