Policy Document on the Green Campus/Plastic Free Campus

Session: 2019-2020 to 2023-2024

GREEN AND PLASTIC FREE CAMPUS POLICY

This policy document covers the measures initiated by College to deal with the waste management and green practices. In College also, the waste management techniques are used with proper planning and management to keep the environment and campus neat and clean. We have placed green dustbins and yellow dustbins in different corners/spots of our college premises for liquid litter and solid litter respectively. More specifically, as far as the measures are concerned, in the following way as per the nature of the waste, its management takes place.

If there is any construction waste in campus, we ensure that it is removed by the laborers and the contractors immediately to make the campus neat and clean. We have also banned plastics on campus to make the college plastic free. There is a ban on using polythenes and other materials of plastics on campus. In the case of used stationary, waste and soiled papers, which are of no use, we divert them to compost pits. The old newspapers and magazines are sold to the scrap dealers.

The waste in liquid form is properly handled, managed and controlled. There are proper lines for disposal of sewage water. As far as the management of e-waste is concerned, after destocking, the old and obsolete electronic products like computers, printers and other electronic items are sold as scrap to minimize the level of e-waste.

The rainwater is collected through pipes in an underground well. The water is used in the garden. There is a lush green garden in the college premises where the sprinkler water is installed. The lawn gets water through this system.

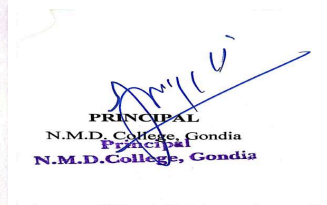

The following green practices are used by the college –

1. Most of the students come to the campus by bicycle. Even the peons and other non-teaching staff used to come to College by bicycles.
2. Some students and staff who come from rural and outskirts areas use public transport like bus, auto, cab, train to reach College.

3. As mentioned earlier, we have also banned plastics on campus to make the college plastic free. There is a ban on using polythenes and other materials of plastics on campus. Boards are displayed to show the use of plastic is not allowed.

4. With the advent of computers and electronic gadgets, everything is going paperless. We at our college have achieved 75% paperlessness as far as the circulation of notices, sending information to students through SMS and other work are concerned.

5. The trees are planted in the vicinity to create a pollution free environment. We have a lush green lawn outside the college which puts the four stars in the beauty of the campus. The college distributes saplings to the students so that they can plant them in their respective areas.

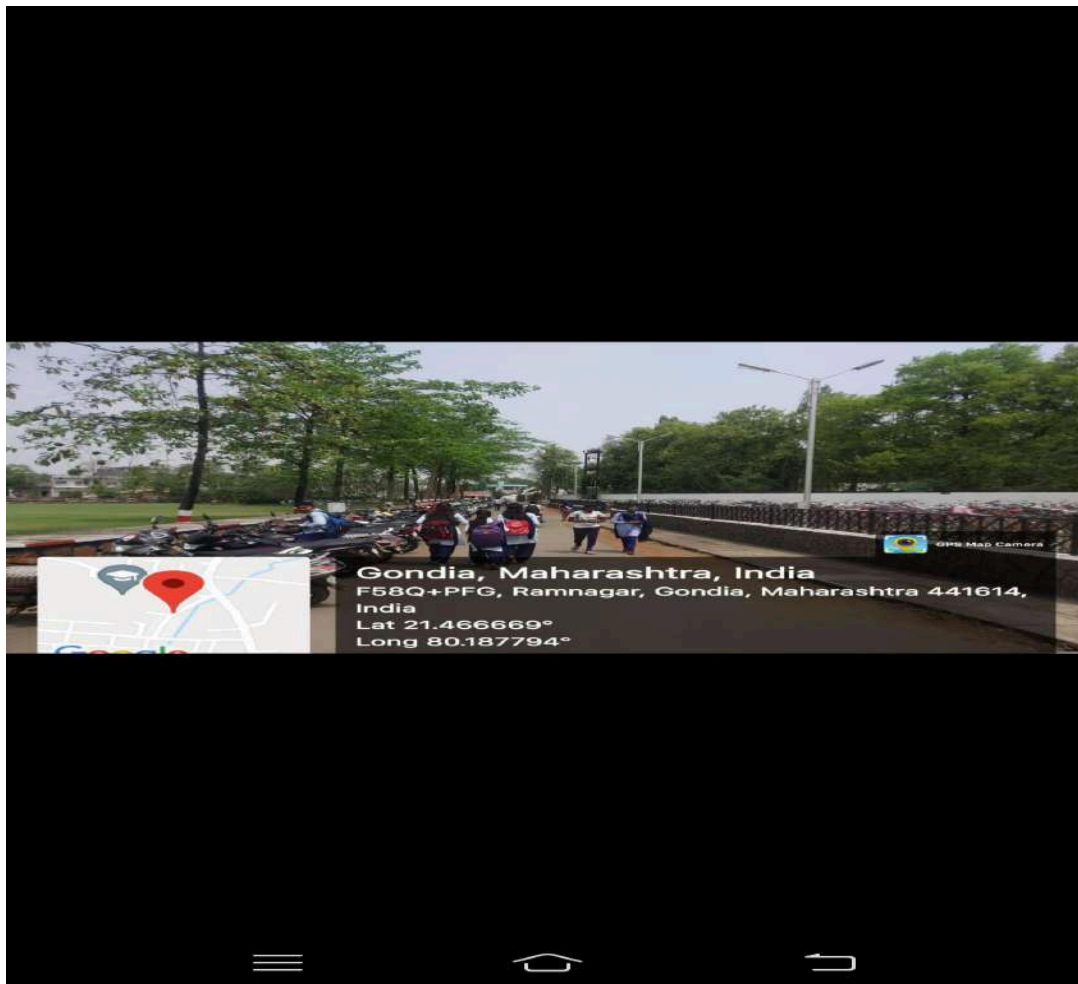

Green campus initiatives include

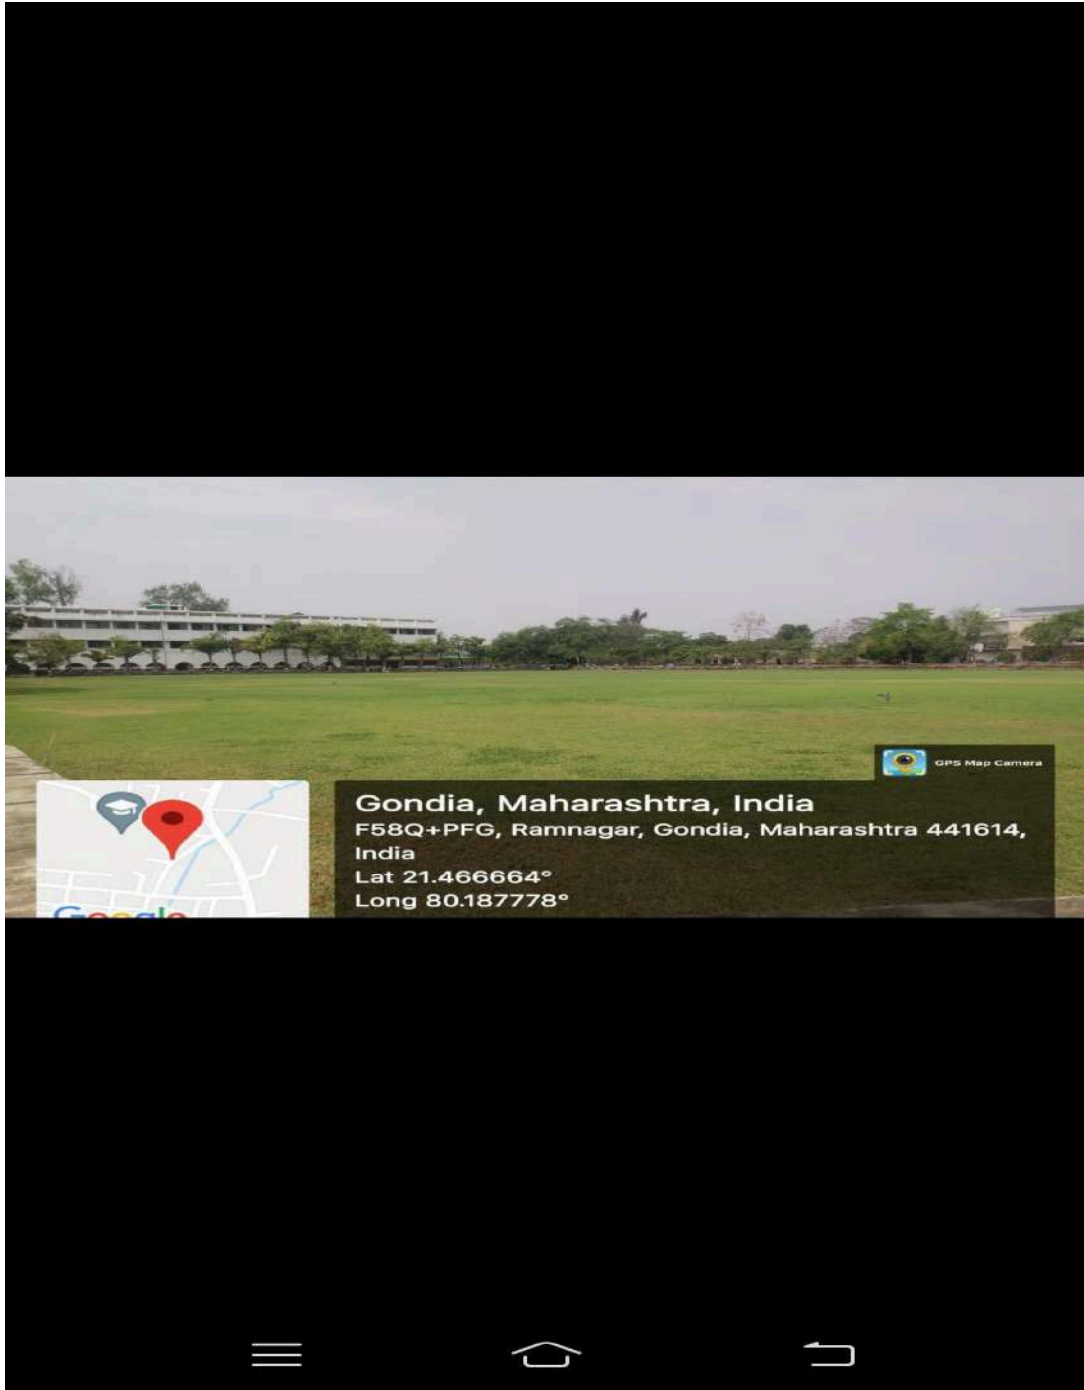

The institutional initiatives for greening the campus are as follows:

1. Restricted entry of automobiles
2. Use of bicycles/ Battery-powered vehicles
3. Pedestrian-friendly pathways
4. Ban on use of plastic
5. Landscaping
