## **Project Information(MCM)**

### ***Title: - Result Processing***

***Explanation:*** - The computerization of this task simple and easy. A Result Processing System Keep major's function Student Detail and Marks of the Student. But the actual work starts from the following ways:-

- Fill Student Detail according to the information of Student.
- Maintaining Student Detail.(Another day)
- Shared data areas are eliminated. Objects communicate by calling on operations (services) offered by other objects rather than sharing variables. This reduces overall **system** coupling. There is no possibility of unexpected modification to shared information.
- To provide all the report according to student details
- Maintaining the day to day transactions

***Front End: - Visual Basic 6.0***

***Back End: - Microsoft Access 2003***

## **Project Information(MBA)**

**Project Topic:-**“An analytical Study on Job stress Management at Maharashtra State Electricity Distribution Company Limited Gondia”

### **INTRODUCTION:**

JOB Stress is stress involving Work.

Stress defined in term of physical and physiological effect on a person, and can be mental, physical or emotional strain. It can also be tension or a situation or factor that cause stress. Occupational stress can occur when there is discrepancy between the demand of the environment /workplace and an individual's ability to carry out and complete this demand. Often a stressor can lead the body to have a physiological reaction which can strain a person physically as well as mentally
